

WIRELESS DIAGNOSTIC INTERFACE SNOOPER+

A MECHANICS BEST FRIEND

Wireless diagnostic interface Snooper+ with Bluetooth connectivity. The integrated LED status display and the mounting bracket ensure ergonomic working. The flight recorder enables mobile data recording - without a passenger.

Unique function: flight recorder for mobile data recording

- All real-time data supported by the control units can be recorded.
- Previous selection of the systems on the PC is possible.
- Start of the flight recorder by using the integrated push button.
- Evaluation and graphic display of the recorded data set on the PC, colour differentiation of the graphs for better visualization.

REAL POWER FOR YOUR DIAGNOSIS!

WOW! Snooper+ (order no. W072 700 100) consisting of:

Snooper+ diagnostic interface with Bluetooth connectivity

- USB cable for firmware transfer
