

WÜRTH PERFECTION LINE

passion needs care

1 | EXTERIOR TREATMENT

A perfect shine

Perfection is a matter of details. The Würth Perfection Line offers you the perfect product for every stage in the cleaning and preparation of your vehicles - be inspired!

INTENSIVE PRE-TREATMENT IS THE BASIS OF PERFECT CLEANLINESS

Check-up

For a perfect cleaning result, it is important to first assess the current state of the surfaces. We recommend that you first rinse off the vehicle with water in order to remove coarse dirt. Only then can you concentrate on the actual work - assessing the problem areas.

Document the state of the vehicle at this stage – as evidence for the client and as a checklist for your next cleaning steps.

Pre-cleaning the problem areas

Insect marks

The front part of the vehicle and the windshield in particular are affected by insect marks. The often stubborn protein stains that sunlight can burn into the surface foil even normal car washes. An effective solution for pre-cleaning such problem areas is provided by our **Insect Remover* | Art. No. 0893 470**.

* Also available in other sizes:
5 liters | Art. No. 0893 470 5
20 liters | Art. No. 0893 470 20

Declare war on protein marks:

Spray insect remover generously onto the affected areas and give it time to take effect.

Tip: Use the Insect Cleaner in conjunction with the innovative new **Clay Series** on page ???, to ensure an even quicker cleaning result.

The simple way to dissolve tar spots, rust film and tree resin

Tar spots

Tar spots are among the ugliest types of dirt, particularly on side sills and rims – and especially on light-colored vehicles. For this use the **Tar Remover* | Art. No. 0890 26** first giving it time to take effect on the affected locations.

Rust film

Würth **Rust Film Remover | Art. No. 0890 130** removes rust film from the bodywork. Simply apply it onto the surface being cleaned and allow it to take effect for three minutes maximum, then rinse off the surface thoroughly with water.

PERFECT INNOVATIONS AGAINST STUBBORN DIRT

The new Clay series cloths, sponges, gloves and pads

The new and highly-innovative Clay series replaces the commonly used practice of solid clay or insect sponges. This series combines the cleaning power of a solid clay with the application advantages of pads, sponges, gloves and cloths! These products will enable you to clean surfaces quickly and gently - the perfect preparation for the following stage of rinsing and polishing.

Clay Pad | Art. No. 0585 300 150
Clay Glove | Art. No. 0585 300 210
Clay Cloth | Art. No. 0585 300 320
Clay Sponge | Art. No. 0585 300 110

Before, during and after use:

The most effective pre-cleaning results are achieved using products from the Clay Series, which combine the cleaning power of a solid clay with the advantages of pads, gloves, sponges and cloths.

Whether it's a pad, glove, cleaning cloth or sponge:

Cleaning with Clay products requires the surface to be damp so that they can glide better and optimally remove the dirt. We recommend water,

Premium Rim Cleaner removes stubborn brake dust from rims:

Simply spray on and pay attention to the time required for it to take effect by watching the color change to red.

Very dirty rims should also be mechanically treated with the rim brush and later rinsed with clear water.

Art. No. 00893 476

Shines like new:

Following the final vehicle wash, the rims are free of all types of dirt.

THE PREPARATORY WORK IS DONE – TIME TO WASH THE VEHICLE

The classic vehicle wash following intensive pre-cleaning involves a car shampoo, a bucket, a **Fringed Glove** | Art. N. 0899 710 005 and a lot of water. For the shampoo, we recommend **Autoshamtwo*** | Art. No. 0893 010 0. It cleans and protects the paintwork all in one – the perfect solution for results-orientated preparators, and also as preparation for polishing.

*Also available in the following sizes:
5 liters | Art. No. 0893 010 05.

As an alternative to Autoshamtwo, our Car Shampoo:
1 liter | Art. No. 0893 012 0
5 liters | Art. No. 0893 012 05

Washing and waxing combined:

The Autoshamtwo from Würth combines two work steps in one!

THE CROWNING GLORY OF THE PREPARATION – PERFECT VEHICLE PAINTWORK

We will provide you with maximum innovative power to make vehicle preparation as easy as possible for you when it comes to polishing and sealing: Now you can look forward to the new, even more efficient and perfectly harmonized products in the Würth Perfection Line. Rediscover your passion for gleaming results!

Polishing Puck or Wave Polishing Pad

Select the polish and pads appropriate for the severity of the scratches and apply evenly in crossing movements. The advantages of our new pads can be seen whenever you polish!

THE PERFECT TEAM FOR SEVERE SCRATCHES

Polish P10

Highly abrasive, quick-action abrasive polish for the immediate removal of severe paint scratches. Combined with our green polishing pads they will give you maximum dirt removal – and a perfect result!

Polish P10, 250 g | Art. No. 0893 150 012

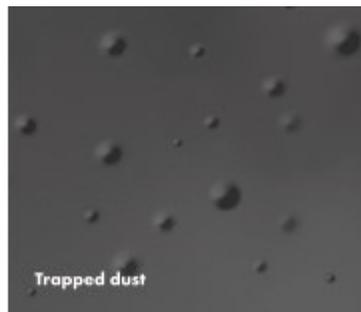

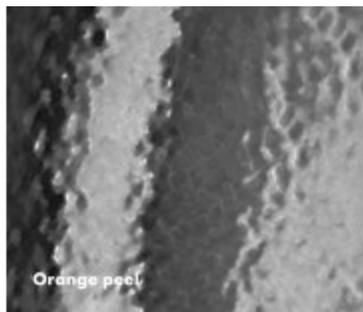

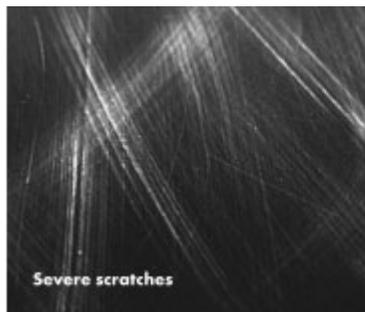

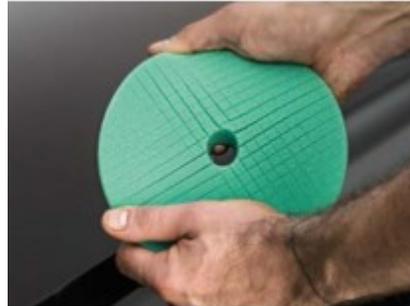

Polish P10, 1 kg | Art. No. 0893 150 010

Green polishing pads series

Hard polishing pads for maximum dirt removal combined with minimal heat build-up. Your advantage: Gentle preparation even where there are heavy paint scratches.

Green pad 90 x 25 mm | Art. No. 0585 025 090

Green pad 145 x 25 mm | Art. No. 0585 025 145

PERFECT PREPARATION ON MODERATE AND MINOR PAINT SCRATCHES

Polish P20

Moderately abrasive high-gloss polish for efficient paint preparation. Moderate and minor paint scratches can be efficiently removed in combination with our blue polishing pads – to deliver a perfect painted surface.

Polish P20, 250 g | Art. No. 0893 150 022

Polish P20, 1 kg | Art. No. 0893 150 020

Polish P20, 5 kg | Art. No. 0893 150 025

Blue polishing pads series

Medium-hard polishing pads for good dirt removal combined with minimal heat build-up. Your advantage: measured hardness, maximum perfection.

Blue Pad 90 x 25 mm | Art. No. 0585 027 090

Blue Pad 145 x 25 mm | Art. No. 0585 027 145

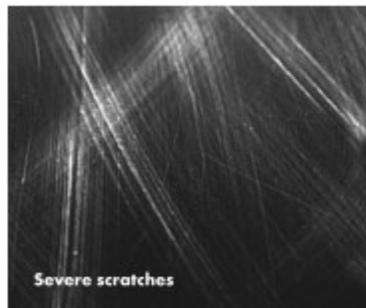

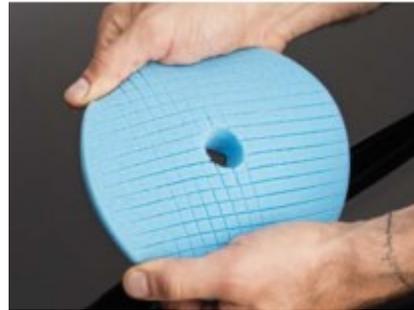

Polish P55

Innovative combination polish for quick results. Enables painted surfaces to be treated and sealed in just one work step.

Polish P55, 250 g | Art. No. 0893 150 056

Polish P55, 1 kg | Art. No. 0893 150 055

Polish P55, 5 kg | Art. No. 0893 150 058

THE PERFECT DUO FOR LONG-LASTING PROTECTION

Polish P30

High-gloss finish for the permanent removal of streaks and holograms on dark vehicle paints. Use in combination with our orange polishing pads to polish your vehicles to maximum shine – that will impress your client!

Polish P30, 250 g | Art. No. 0893 150 032

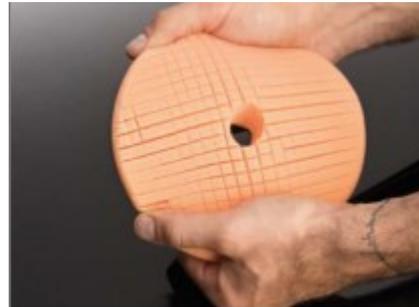

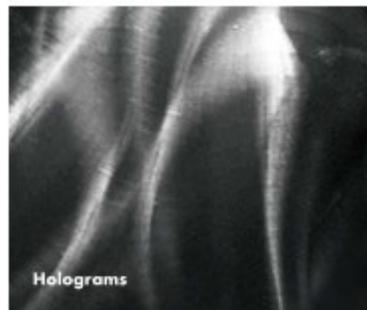

Polish P30, 1 kg | Art. No. 0893 150 030

Orange polishing pads series

Medium-hard polishing pads for good dirt removal combined with minimal heat build-up. Your advantage: measured hardness, maximum perfection.

Orange pad 90 x 25 mm | Art. No. 0585 026 090

Orange pad 145 x 25 mm | Art. No. 0585 026 145

OUR RECOMMENDATION FOR LONG-LASTING PROTECTION

Pink Paint Sealant

The perfect finish - a long-lasting high-gloss seal. Smooths the finest textures in the paintwork and leaves behind a mirror-like surface. The product also provides long-lasting protection against the weather, car wash scratches and other environmental effects. Perfect handling is guaranteed when used in combination with our black polishing puck*!

Pink Paint Sealant, 250 g | Art. No. 0893 011 250

Pink Paint Sealant, 1 kg | Art. No. 0893 011 01

Pink Paint Sealant, 5 kg | Art. No. 0893 011 05

Alternative:

Polymer Paint Seal | Art. No. 0893 158 or Paintwork and Rim Seal | Art. No. 0893 012 301

Black Polishing Puck

An ergonomical shape made of very fine-pored foam to efficiently seal painted and plastic surfaces. Your advantage: Even hard-to-reach areas can be treated!

Black Polishing Puck 130 x 50 mm | Art. No. 0585 281 130

Orange Polishing Puck

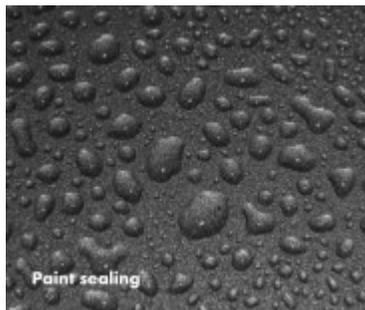

The manual solution for all polishes: A perfect ergonomical shape made of solid yet fine-pored foam for working manually with all polishes. Your advantage: A puck for all polishes!

Orange Polishing Puck 130 x 50 mm | Art. No. 0585 261 130

Alternative:

Wave Polishing Pad | Art. No. 0585 28 130

Lambkin Premium, black 135 mm | Art. No. 0585 135

TIP

We also recommend the **IPA Cleaner | Art. No. 0893 223 500** as a control spray before sealing.

2 | INTERIOR TREATMENT

Perfect care

You need the right product to tackle all types of dirt and for every job. The Würth Perfection Line offers you a complete range for interior treatment - perfect quality for simple but effective interior care!

BASIC CLEANING AND CARE: WITH ACTIVE CLEAN

The first interior care job is to remove coarse dirt particles and dust. The seats and foot wells should be vacuumed before every cleaning so as to reveal any water marks or heavy soiling. Document these marks for your client! Do not start with the intensive cleaning until you have done this.

Deep cleaning and care

Perfect interior treatment combines cleaning and protection all in one. The optimum solution for this is the vehicle cleaner **Active Clean** | Art. No. **0893 472**. The product delivers a perfect combination of both steps: Deep cleaning and care - saving you time and money. Spray Active Clean onto a micro-active cloth and clean the surface evenly. This prevents irregularities as well as deposits on the windshield.

Alternative:
Vehicle Cleaner FI, 1 liters | Art. No. 0890 120

Even the basic clean with **Active Clean** delivers visible cleanliness. For special surfaces such as the cockpit, windshield, mirrors and displays we recommend also using the special cleaners from the Würth Perfection Line. You can find these on the following pages.

Our **Cockpit Cleaning and Care Spray** is the perfect solution for fittings. Simply spray it onto a microfiber cloth and clean the cockpit.
Art. No. 00890 222 1

WE HAVE THE PERFECT SPECIAL CLEANER FOR GLASS SURFACES, DISPLAYS AND THE COCKPIT

Our **Cockpit Cleaning and Care Spray*** | Art. No. **0890 222 1** is a perfectly tailored product for effectively removing dirt and caring for the cockpit surface at the same time. Freshens up the colors and gives a silky matt sheen. It also has an anti-static effect and thereby prevents surfaces from getting dirty again quickly.

The **Glass Cleaner*** | Art. No. **0890 220 01** is perfectly suited to the rear-view mirror and windshields. It removes all trace of fingerprints, dust, road film and nicotine and wax stains. It is best used with a dry, low-lint micro-active cloth.

Windows and mirrors are best cleaned with a **micro-active cloth** and environmentally-friendly **glass cleaner**.

Leather Care | Art. No. **00890 222 1**
